

## Curriculum Vitae

Elisavet Mantzana has studied Conservation of Antiquities and Cultural Heritage Artifacts in the University of West Attica (BSc). In 2018 she has completed her post graduate studies in Cultural Heritage Materials and Technologies (Cult-Tech) in the University of the Peloponnese (MSc).

Today she is a PhD candidate in the Laboratory of Archaeometry, Department of Archaeology, History and Cultural Resources Management, University of Peloponnese. Her main research interest focuses on the chemical analysis, provenance study and conservation of stone tesserae and mortars from mosaic floors.

As conservator she had participated in studies and implementations of several restoration and conservation projects for monuments all over Greece. Her field of expertise is the conservation of stone, mosaics and other architectural remains.
